

## JetXpert Ink Supply System

Fully integrated system with active gravity meniscus control

A Low-Cost System for Automated and Regulated Ink Supply.

### FEATURES AND BENEFITS

ImageXpert's Universal Ink Supply System is a self-sustaining system that keeps ink flowing using adjustable negative pressure.

System includes:

- 1 ink supply tank
- Integrated base with pumps and power switches
- Vertical stage with sub tank
- 1 set of tubing and filters
- Waste ink collection system

- Works with all liquid inks: Suitable for aqueous, solvent and UV curable inks
- Single color delivery module
- Stage for easy adjustment of sub-tank height
- Ink level sensor for automated sub-tank refill
- Dedicated button for easy purging
- Power and ink level indicator LEDs
- Fully integrated and available as a stand alone unit or as an add-on to JetXpert systems
